Reduce, Reuse and Recycle and get a \$75 Reward

From November 1, 2011–February 28, 2012

Minnesota Power is encouraging you to Reduce, Reuse and Recycle appliances and electronics that make up over 35% of the electricity usage in a typical home. Get started now and round up your second refrigerator or freezer along with up to three window air conditioner units—and **get \$75** at the same time!

It's as easy as 1-2-3 ...

1. Call **1-866-552-6755** or visit us online at **www.mnpower.com/RefrigeratorRecycling** to place your order for appliance pickup by a Minnesota Power contractor.
2. Make sure someone is home who is at least 18 years old on the date of selected pickup. Remember, the refrigerators, freezers and window air conditioner units must be in working condition (remove air conditioner from window) and easily accessible for removal from your home.
3. Present the Minnesota Power contractor a copy of this coupon to qualify for the **\$75 Reward** for recycling up to three window air conditioner units in conjunction with the pickup of a refrigerator or freezer. Remember, to receive the \$75 Reward* you must recycle a working refrigerator or freezer in order for us to pick up the qualifying air conditioners (up to three).

You can be assured these appliances will be properly **recycled**, the usable parts will be **reused** and you will help **reduce** energy usage in your home. If you have questions, please call us toll free at **866-552-6755**.

Reduce, Reuse and Recycle. *power of one*® ... it begins with you

*\$50 for refrigerator or freezer only.
