

\$200 BONUS

*Limit one coupon per Triple E new home.
Not applicable with any other bonus offer.

Use this coupon for
Ground Source Heat Pump (GSHP)
in approved Triple E New Construction

With the \$200 bonus, rebates are **\$400/ton** on closed loop systems and **\$300/ton** on open loop systems, with a maximum rebate of \$2,150.*
(Standard GSHP rebates are \$200/ton or \$100/ton based on type of system.)

January 1–December 31, 2018

*Staple this coupon to the GSHP rebate form for your customer
to qualify for this bonus offer when building a Triple E home.*

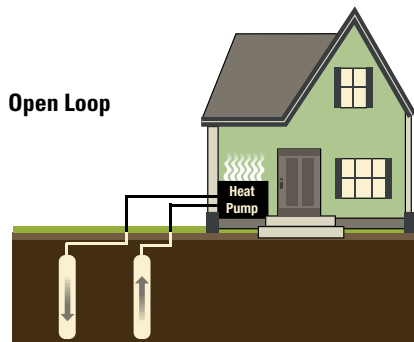

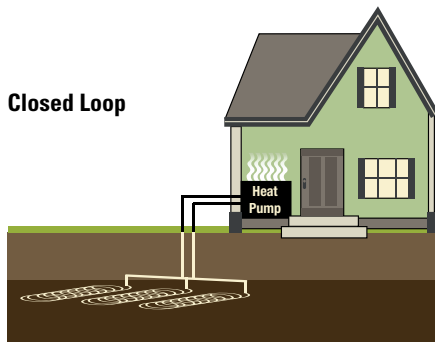

Benefits of GSHP in Triple E New Construction:

- Get heating and cooling from one system and take advantage of renewable energy from the earth.
- GSHPs are one of the most efficient residential heating and cooling systems available today with heating efficiencies 50–70% higher than other heating systems and cooling efficiencies 20–40% higher than available air conditioners.¹
- Triple E homes show an average of a 25% reduction in space heating costs compared with conventional new construction.
- The combination of a Triple E home with a GSHP delivers the comfort, reliability and energy savings to get the most for your energy dollar.

¹ International Ground Source Heat Pump Association

Types of Systems:

Ground source heat pumps (GSHPs) are electrically powered systems that tap the stored energy of the greatest solar collector in existence: the earth. These systems use the earth's relatively constant temperature to provide heating, cooling and hot water for homes.

Triple E Builder, please contact a participating GSHP installer to find out more about this special offer and share it with your customer. Find a list of program participating, IGSHPA certified installers at www.mnpower.com/GSHPcontractors
