

Electric ride. Clean drive.

Discounted rate for
electric vehicles

AN ALLETE COMPANY

Minnesota Power can help keep your electric vehicle charged and ready to go.

Option 1: Choose Minnesota Power's off-peak service rate

We offer a discounted electricity rate for residential customers charging an electric vehicle (EV) during off-peak hours (Saturday, Sunday, and 10 p.m. – 8 a.m. Monday-Friday, select Holidays (New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day).

Service under this rate will be separately metered. There will be a cost to install the additional meter and a monthly service charge of \$4.25. Taking service under this rate also gives you the option to purchase energy from entirely renewable sources.

Option 2: Plug it in anytime just like any other electric device

Use the electric service you already have at home, plugging in to any standard 120-volt outlet. Or plug into a standard 240-volt circuit similar to the style used for an electric clothes dryer. The amount of time it takes to charge your vehicle can vary widely depending on the volts and amps of the power-supply. Standard electric rates apply.

How much will it cost?

Your bill impacts will depend on the type of electric vehicle you own, amount of charging (determined by the miles you travel on battery) and whether you sign up for Minnesota Power's off-peak service rate for electric vehicles.

Charging up away from home
